Summary

Small cap and emerging market performance have not been great recently, and we have heard caution from some prospects citing that, in fear of a pullback, they're mostly staying on the sidelines for now. This doesn't eliminate them from being a valuable lead in our pipeline though. Given that Blackhawk has extremely positive fundamentals, we are able to provide many reasons that make us an excellent investment opportunity regardless of what the market does.

Key Takeaways

- Here we can have a list of key take away, Ideally there should be atleat one key take away for each report section and max of five key take aways

Connect with Brokers to grow Blackhawk portflio

The Canadian pipeline continues to expand as we add new prospects interested in Blackhawk, some who have been watching since the IPO was launched. Brokers we've spoken to are excited to inform us oftheir successes investing in Shopify and we are effectively leveraging both our similarities and differences as a reason to consider adding Blackhawk to their portfolios.

Focus more on Mid Cap Market

Small cap and emerging market performance have not been great recently, and we have heard caution from some prospects citing that, in fear of a pullback, they're mostly staying on the sidelines for now. This doesn't eliminate them from being a valuable lead in our pipeline though.

Focus more on potentially influential institutional leads

While continuing to expand the Canadian pipeline and manage top US leads, we will add some more focus on potentially influential institutional leads such as analysts, fund managers and investment bankers.
